Subject: Net Metering Hearing

Dear Mrs. Boyd, While it has been suggested that a significant report related to net metering will not be available for a few months, please nonetheless continue with your proposal to hold a hearing on the subject in September 2013. The S.C. Chapter Sierra Club believes there is good reason to obtain public input on the matter at this time. Public input can be expected to show measures which should be subject to policy-development for the Public Service Commission.

Net metering rates are a significant aspect of making installation of home-owner and small-business solar panels cost-effective. Encouraging such installations will clearly lead to reduced electric power costs in South Carolina.
